CHRYSANTHEMUMS

Each year we are finding a larger number of gardeners who grow the regular florists varieties of indoor chrysanthemums either in their own greenhouses or in protected locations outside. We have known of very fine flowers being produced by planting in six inch pots, then moving them into a cool sun room when frost threatens, where they give weeks of pleasure.

LARGE FLOWERING VARIETIES

These are potted, bedded or benched in early June, pinched two weeks later; staked as necessary, fed liquid fertilizer once in two weeks and disbudded to one flower per stem to produce those gorgeous blooms during October and November.

SILVER SHEEN - Early white incurved, in bloom about Oct. 20.
MRS. H. E. KIDDER - Golden yellow, a general favorite. Oct. 20.
INDIANAPOLIS WHITE - Huge incurved of pure white. Nov. 8.
INDIANAPOLIS PINK - Large incurved orchid pink. Nov. 8.
ANACONDA - Rich bronze red with backs of petals tan. Nov. 10.
HELEN FRICK - Broad incurved petals of soft rose pink. Nov. 20.
EDWIN D. SEIDWITZ - Deep shell pink, very pleasing. Nov. 25.
SMITHS LATE WHITE - The best of the very late large whites. Dec. 15.
TOBIN'S LATE YELLOW - A fine clear yellow companion to the above late white. Dec. 15.
FRIEDA - An outstanding collarette with pleasing pink ray petals with creamy yellow cushion. Nov. 10.
Each .50 Ten of one variety. \$3.50

GREENHOUSE POMPOM VARIETIES

We usually bench or pot these during the month of June, pinch two weeks after planting, feed same as the large varieties but do not disbud.

JEWELL - Solid pink, very popular. Oct. 10.
MARY MAC ARTHUR - Pleasing rich rose. Oct. 20.
POP CORN - A very fine white, fine for specimen plants. Oct. 25.
ILLINI SNOWFLAKE - A good solid white producing long stems with many flowers. Nov. 10.

JEWELL - Solid pink, very popular. Oct. 10.
MARY MAC ARTHUR - Pleasing rich rose. Oct. 20.
POP CORN - A very fine white, fine for specimen plants. Oct. 25.
ILLINI SNOWFLAKE - A good solid white producing long stems with many flowers. Nov. 10.
RUSTICON - A rich reddish bronze, very popular. Nov. 10.
CRYSTAL BEAUTY - Very fine white, each petal folded. Nov. 20.
RIVIERA - A rich pink with heavy foliage and stems. Dec. 10.
VIBRANT - Rich golden yellow, long lasting. Dec. 10.
GOLD COAST - A very fine yellow, solid flowers. Oct. 20.
BONTON - Very pleasing golden bronze. Oct. 20.

Each .35

Ten of one variety. \$3.00

FUJI VARIETIES

Favorites with all who enjoy the unusual. Petals are long and tubular with many sorts widening and curling at the ends like an ostrich plume. Give same treatment as for the Large Flowering Varieties.

PEGGY ANN HOOVER - One of the hardiest, often grown outside. Soft lavender pink. Nov. 5.

PINK CORD - A really fine, rich pink with heavy cord-like petals. Nov. 10.

KAY TASHIMA - Lacy white with long hooked petals. Very unusual. No. 10.

MARTIN'S WHITE - Slender petals of the rayonnante type. Oct. 25.

BESS WITT - A soft pleasing light golden bronze. Nov. 10.

ALBERT WITT - Slender soft yellow tightly rolled petals. Nov. 10.

Each .50

Ten of one variety. \$4.50

CASCADE VARIETIES

These are the dainty trailing sorts that make very unusual specimens. Should be grown in pots, tied to a wire stake at right angles to the pot after reaching 10 to 12 inches of length. Gradually bend the wire until it hangs straight down after Sept. 1. Pinch the main stem about July 1, then again July 25.

ANNA - Beautiful starry white flowers with golden centers.

JANE HARTE - Like the above of soft yellow coloring.

GERTRUDE COMPTON - A very rich yellow with collarette of the same shade.

THE REAL MC COY - A delightful shade of soft rich pink. Very pleasing.

Each .50

SPECIAL OFFER

One each of the above Large - flowering, Fuji, Pompom and Cascade varieties for \$12.50.

GARDEN CHRYSANTHEMUMS

Our collection of garden chrysanthemums is made up of only the varieties that are sturdy, good growers and hardy here in our northern area. Most of these sorts blossom early enough to permit perfection of blossom before severe freezing. We suggest late May or early June planting in a sunny well-drained location. We fertilize with a good commercial fertilizer at planting time, pinch out the tips early in July to make the plants bushy. Then give a side dressing of a complete fertilizer in mid August, water as needed, but thoroughly thru the growing season. We suggest a covering of straw applied after the ground is frozen to prevent alternate freezing and thawing during the winter.

PLEASE DO NOT ASK FOR DELIVERY PRIOR TO MAY 15.

35¢ EA.

ALLEGRO - Shrimp pink pompom. Tall. Oct. 12.
 ANDREW - Pleasing red. Tall. Oct. 15.
 AVALANCHE - Creamy white, large decorative. Tall. Oct. 1.
